MICRO ENHANCER+

APPLICATION RATES – TOMATOES

Micro Enhancer Plus should be used with proper plant fertilizer, nutrient and weed/pest management programs for maximum tomato yield and quality.

General Suggestions

Micro Enhancer Plus should be applied several times per year with irrigations or other applications. It can be tank mixed with fertilizers, herbicides or pesticides. It can also be applied through micro-irrigation systems, drip-sprinkler systems or with flood irrigation.

- We recommend 20% Micro Enhancer Plus with herbicide tank mix

Budget

Reduce fertilizer cost by 25% and add **Micro Enhancer Plus** cost here

Specific Rates

1. First month, add ½ gallon Micro Enhancer Plus per acre with fertilizer application
2. Every month thereafter, add ½ gallon Micro Enhancer Plus per acre with irrigation or fertilizer applications

Economic Benefits

- Improved plant health
- Vigorous root growth
- Soil nutrients more available to roots
- Faster maturity
- More tomatoes per plant
- Consistent, even size
- Reduced disease problems

*** Can also be used in **greenhouse** seedlings ***
